

国华能源有限公司

Dear Mr. Nicholas Clarke and Ms Qian Yiwen,

I am writing this letter to thank CRM for the work done for Guohua's Windfarm CDM Projects. On 4th and 5th this month we received respectively the registration notifications from EB on Manjing West Windfarm Project (2040) and Huitengliang West Windfarm Project (2047). This is a monumental breakthrough for the collaboration between CRM and Guohua.

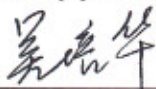

I am writing to especially thank one of your team members, Miss Yao Yanxia as well. In charging of the two above-mentioned projects, Miss Yao had worked seriously and was fully committed to her work. She had showed us with professionalism and technical competence during the one-and-a-half-year's project development time. I think, that's what a good CDM project manager will be.

I hope our collaboration will still continue for further success. We have reason to believe that 2009 will be a fruitful year. Guohua hope that the registration of Manjing North Project and Qijiashan Project will finally be done in 2009.

Furthermore, we have several Golden Standard projects. Guohua have attached great importance to the development of these projects. Therefore, Guohua really hope the successful development of GS project will be another milestone of our collaborations in 2009.

Finally, I sincerely invite you two to visit our office next time you come to Beijing again.

Faithfully yours,

WU Peihua

Chief Engineer
